SUMMARY

Senior REACT / NEXT.JS engineer with ~8 years of experience building web applications in the React ecosystem. Most recent work focuses on NEXT.JS based FULL-STACK applications and internal platforms.

Previously worked on enterprise insurance systems at Sapiens, mainly contributing to REACT/NODE.JS based claim and policy workflows for Folksam insurance agency (SWEDEN), serving 4+ million customers.

Strong focus on component architecture, design systems and scaleable front-end structure. Earlier background in UX, creative direction, product design and game design.

Recent work includes several NDA projects involving REACT / NEXT.JS applications, AI API integrations and cloud services.

EXPERIENCE

FULL-STACK / LEAD FRONT-END DEVELOPER2025

STARTUP PRODUCT, NDA

- Worked on a pre-launch startup product as a lead FRONT-END developer
- Rebuilt an early NEXT.JS prototype into a maintainable cross-platform and production-ready application
- Integrated frontend with internal and customer backend APIS
- Worked with SUPABASE and cloud infrastructure
- Improved internal AI workflow and implemented new AI API integrations
- Mentored and supervised a small team of younger FE developers
